Friction Evidence Card

Observe the experience before prescribing a fix. Use one card per distinct obstacle.

The evidence to capture

The task the person came to complete

What did they actually want to achieve?

Notes / observations	

What happened in the observed journey

Describe a concrete step, error, delay, restart or handoff.

Notes / observations	

People affected and available alternatives

Who struggled? Who could not proceed?

Notes / observations	

What you know and how you know it

Observed, measured, reported, or only hypothesized?

Notes / observations	

Proposed improvement and necessary safeguard

What could change without reducing consent, safety or access?

Notes / observations	

What would prove that it helped

Choose one outcome, baseline and review date.

Notes / observations
